

**WHENEVER. WHEREVER.**  
**We'll be there.**

**Newfoundland Power will need the following pieces of information from your vendor/installer before we can start processing the financing form:**

**1. Name of the Refrigeration and Air Conditioning Mechanic completing the installation:**

---

**2. Contact number for the Refrigeration and Air Conditioning Mechanic**

---

**3. Name of electrician completing the electrical work**

---

**4. Contact number for the Electrician**

---

**5. Heat pump manufacturer**

---

**6. Model of outdoor unit**

---

**7. Model of indoor unit (s)**

---

**8. Total amount of financing requested**

\$

---

**Note:**

Before a financing application is approved, the installer must provide Newfoundland Power with documentation confirming they are a journeyperson Refrigeration and Air Conditioning Mechanic, if they have not done so already.

Once the installer and equipment have been verified and customer credit is approved, we will notify the customer they have "Approval Pending Electrical Permit". At this point, the customer should notify the vendor/installer to proceed with the request for an Electrical Permit from the City of St. John's or Service NL, depending on the location of the home.

Once Newfoundland Power has received the Permit, we will provide the customer with the final "Approval Number" which they will provide the installer and advise to proceed with installation of the heat pump.

These requirements are mandatory for financing approval to ensure the work is performed safely.
