

# ENGINEER (ELECTRICAL)

ST. JOHN'S – CLOSING DATE: JULY 10, 2019

COMPETITION NUMBER: NPJP-2019-24328

## Are you ready to explore an exciting career in a fast-paced, high-performance environment?

If you are seeking a challenging and rewarding career with room for continuous advancement and a competitive compensation package, have we got an opportunity for you! We are looking for a highly motivated team player with a strong commitment to safety and customer service, an excellent work ethic, and effective interpersonal and communication skills.

As a valued member of our Planning Team, you will conduct transmission and distribution studies to determine how the power system needs to be upgraded to meet the future requirements of customers. These studies will include meeting the requirements of distributed generation, electrification of transportation, and opportunities for automation. All engineering and planning work will meet applicable industry standards and guidelines for electric utility system engineering and planning.

Your qualifications include a Bachelor's degree in Engineering (Electrical). You must be eligible for membership with PEGNL. You are proficient in the use of Microsoft products including Excel and are familiar with electrical system planning software. Experience in an electrical utility environment is considered an asset. You have strong analytical and organizational skills and the ability to work in a team environment as well as on your own.

Apply online at [newfoundlandpower.com/en/About/Careers/Career-Opportunities](http://newfoundlandpower.com/en/About/Careers/Career-Opportunities).

We thank all applicants for their interest but only those selected for an interview will be contacted.
